PROJECTS

Global Superstore Data Modeling & Analysis

Sept 2024 – Personal Project

- Modeled and normalized a MySQL database with ER diagrams for global sales data.
- Designed interactive Tableau dashboards for real-time business insights.
- Conducted exploratory data analysis to identify trends in product sales and geography.

Little Lemon Database Management System

Sept 2024 – Personal Project

- Designed logical schema and physical implementation of customer/order system.
- Wrote advanced SQL queries (JOINS, subqueries, procedures) to handle operations.
- Used normalization to reduce redundancy and improve efficiency.

Facebook Ad Conversions – Linear Regression in Python

Oct 2024 – Personal Project

- Built and interpreted a linear regression model using Python.
- Conducted statistical testing (Shapiro-Wilk, residuals analysis).
- Visualized conversion behavior using Matplotlib and presented optimization strategy.

Retail Sales Dashboard & Trend Insights

2023 – Role-Based Case Study

- Created Tableau dashboards visualizing KPIs for retail performance.
- Analyzed customer demographics and buying patterns to guide promo planning.
- Integrated forecasting logic to assist with inventory prep.

TECHNICAL SKILLS

Programming & Scripting: Python, SQL, JavaScript, HTML, CSS

Data Tools: Excel, Google Sheets, Pandas, NumPy, Matplotlib, Seaborn

Visualization Platforms: Tableau, Power BI

Databases: MySQL, ER Diagrams, Normalization, Stored Procedures

DevOps & Cloud: Git, GitHub, Azure, Google Cloud, CI/CD Concepts

Security & Monitoring: Cybersecurity Basics, Threat Awareness, Systems Auditing

Other: Time Management, Technical Writing, Communication, Leadership, Adaptability

HOBBIES AND INTEREST

- Coding Challenges & Personal Projects
- Cloud Security, DevOps Automation
- Reading and Listening to Tech Podcasts
- Fitness & Discipline (Veteran Focused)
